There was a leak in my roof and came out to fix it. They tried to fix the leak three times so I had to hire a different company. After the second time they tried to fix the leak I called them about the leak because they had not fixed it. They said they would come out in a few weeks to look at it. The coordinator was very rude to me in her email.

As far as I know, they did a fine job. It doesn't leak anymore, so they solved the problem.

We have not been able to say enough about their willingness and integrity. We went with them because they were local for us, and we were so glad we did!
