They did good work. Chris sat down with us and made sure we had everything we wanted. Even if something we wanted was over budget, he still made it work. Couldn't ask for a more honest, sweet, and caring builder!

COMMENT Chris went above and beyond to help me locate a site in the area where I wanted to live. In fact, he was the one who heard about the site and passed the information on to me. He was also very amenable to any changes I wanted to make. He was extremely helpful in making good suggestions to someone who had never done the home building experience before. He helped me find a fence builder after my home was finished who billed me at Chris' price for the fence.

Their attention to details was good, the quality of materials was good (especially for the price they were charging), it was a very efficient build, and they kept on schedule very well.
