Jul 29, 2025

They were very professional. From the driveway up to the door, they came in, and it was boots on the ground. From there, they helped me understand, and helped me calm down. I'm in a three-year-old home, and the sewer water came from upstairs to the basement. They were very professional, and said ma'am, you will be okay. They said they would investigate, take care of it, and get me back up and running. I was calm, and they reassured me. I felt comfortable and all the anxiety I had calmed down. Everything came down to hold when they came here. They walked me through what they saw and how they would take care of it. They set up huge air blowers and immediately got that running. Furthermore, they cut out what was wet, and they were on the ball. In 2025, you have a team of young men doing work like that is amazing. The smell was awful, and it was crazy. I was very upset and didn't know what to do. The lead guy, Alan, was very professional. He was a young guy, and he led his team in here. They talked to me and explained things, it was just awesome. I couldn't have asked for anything or anyone else better than that group. I am very serious.

I thought they did a professional job and all of the workers seem to know what they are doing. They got the job done and did so in the rotation that it needed to be. Everything was just fine.

Our project manager, Greg Sweetwood, did a fantastic job keeping our fire restoration on track. Greg was always available when I needed him. We are very happy with the quality of the workmanship on the restoration. I highly recommend Georgia Water and Fire Restoration and would use them again. Regards, Jack Lipasek

The contractors that were used were not respectful of our property and they caused damage to our property that Georgia Water and Fire were not willing to take responsibility for. It caused us additional damage and work that had to be done that they refused to complete

★★★★★

All workers sent to my home were non-english speaking so communication difficult. Must always be aware of what materials are being used to avoid substandard quality of replacement materials. Some agreed upon things were not honored by contractor even with a second reminder. Once job was completed I have not had any response to 2 requests (for the same thing) to the contractor.

I was very happy with the quality of the work done and my interactions with Steve, our project manager Cody and all of the contractors. They went out of their way to work with me to get the damage from my 2nd story hot water heater break and damage repaired. Have already shared with others that they are the company to call!!

REVIEW

George G.
Kennesaw, GA
Oct 25, 2015

Unfortunately, We had a severe water leak two months ago. We had a plumber come in and make the repairs - actually repipe the whole house. After the leaks were repaired, we had our Insurance Co. recommend a contractor to repair the wallboard that was damaged in the 6 rom that were affected. When they were done we made a final inspection and found that the walls that were to be painted were not prepped - there were holes they just painted over and only one coat of paint was used when two coats were specified. We were also charged for replacing wall paper when wallpaper was removed and the walls repainted. I have had to hire another company to finish the project the way it should have been. The crew was very rude to my wife and she told them she did not want that crew back in the house - In fact I have fired them from this project. The crew's supervisor also called my wife a liar which really made her angry. I would not hire this company for anything any more.
