The design service was extremely helpful in designing our bathroom update. We had some ideas about what we wanted and the process our designer used to help her understand our tastes helped her but also helped us to see the options available and better think through what we wanted and what could work best in our space. The sales person at the Kohler store was also very helpful in showing us the options the designer chose so we could clearly see how items looked together. Definitely a must for anyone trying to design a bathroom or do an update. We are extremely pleased with the results.

Heather was great to work with. She listened carefully and provided options that reflected my tastes and needs. After we finalized the design, she reached out to the local Kohler Design Store to connect them to me so I could see the actual products and get quotes. I highly recommend this service.

Helped me a lot. Clear plan on how to complete the bathroom from floor plan to items to purchase. One issue was the vanity countertop recommended. It is a small vanity and the Cambria marble recommended only came in full slabs and was very expensive when I only needed less than half of a slab. There was no alternative provided that matched the other tile s and color plan. I also did not receive recommendations on floor and wall tile grout color to match the color scheme.

Mar 30, 2020

I thought the end product was extremely lacking. The renderings didn't look correct since the windows and ceilings were not correctly represented even though pictures and dimensions were provided. I also thought the selection process was very limited. I would not recommend this to anyone as I thought the results were poor and not worth the cost.

Jennifer was amazing! She completely got the look we were going for, and she put together a comprehensive design that worked for us. Having the rendering so we could see what it would like was so helpful, and having samples to take with us was helpful too. This was a bargain for design help - would absolutely recommend. Jennifer kept us informed of the process at every stage. All around, it was great!

Feb 25, 2020

Absolutely recommend! I'd love to design and decorate my home, but without Angela's help, I never would have come up with the floor plan for my small (6' x 8') bathroom space. We were able to put everything I wanted into this room, and it will be fabulous! Well worth the money I spent on the service. I will save that much being able to present a well designed plan to my contractor, not to mention the rebate on Kohler products I use in this bathroom.

Feb 17, 2020

I hired a local decorator to assist me with a home remodel in 2008 and she was OK. I had no idea that Kohler did these services but I am extremely pleased with the results that Tracey produced for me on my master bathroom remodel. The whole process was amazing and she is very talented. It produced a master bath plan that I never imagined would be so great. I just received my sample box with the tile and cabinet surfaces and can really see how it will look. I am dreading construction, but am really excited about the outcome. It's going to be the best bathroom ever.

Jan 12, 2020

I loved the Kohler Design Service. Living in a remote area it was such an easy process without having to drive around to look at samples and “shop around”. The design pictures, which included all the products I selected, were amazing and really provided a vision of my future master bathroom. It was also great to receive a product box with samples so I could actually “feel” the product. So easy and so creative. Thank you Kohler for making my bathroom remodel a seamless process.

Dec 31, 2019

Working with Kohler Bathroom Design Service is an easy and cost effective way to take all of the concepts, notes, measurements and pictures that represent our ideas for remodeling and transform them into more practical, actionable forms. In our case, we've discovered that walking through the process changed our approach to some key design elements. With plans and renderings in hand, we are still doing some markups/mock-ups to double check each key aspect before starting the build process.

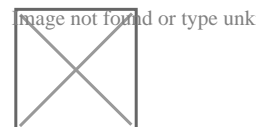

REVIEW

Dec 21, 2019

I'm glad I used this service - it saved me a lot of time that I didn't have to spare. I have a bathroom that I envisioned but didn't know where to start on selecting products on my own. I recommend using pros to help design kitchens and master bathrooms because messing them up will cost you in your home's value.

I was amazed how well it worked collaborating with a designer remotely. Erin was excellent. I felt she had walked through my home; she had such a great sense of space as it currently stood and what it could become. Everything was so professional. The tile guy was amazed at the drawings I gave him. A great sense of WOW!

REVIEW

Beverly O.
Davidsonville, MD
Nov 04, 2019

I was very pleased with the Kohler Bathroom design service. The process was easy and the designer offered 2 options which kept my budget goals in mind. The final design was beautifully presented. I highly recommend this service for a simple bathroom "refresh", however I don't suggest using this service if you are doing a major renovation of a bathroom. Other than replacing the toilette and sink and adding new tile, we wanted to convert a tub into a shower stall only - we discovered a few snags during the construction process that we were able to solve but did take us by surprise - I think because the designer was relying on photos and actually see the space these snags popped up. They were unavoidable but would have been good to know ahead of construction.
