The Sales was done professionally, and answered all questions and concerns. The date to start the work was agreed upon and kept. The crew had stripped the roof of its cedar-shakes, removed from the site, and the new aluminum roof installed in 5 business days. Each day, the crew left at the end of the day, after cleaning up all lose material by taking it away, or leaving it in their trailer, which was kept on-site till the job was complete. Since installation almost two years ago, the roof has never had a concern or issue, and functions as expected. It has seen two storms which included hail. Much to my surprise, the hail, and rain were not "loud", or at least not any louder than when we had the shakes on the roof. Two minor concerns have been a map of where the "solid" pieces are for walking on, and that once installed, cell-phone signals are weakened in the middle of the house - I have to stand near a window to maintain a signal, or go outside when viable. May need an antena for inside the house.

We cannot say enough good things about the expertise, professionalism and quality of work the staff and crew at Roof Guard provided. From the talks in the beginning to the follow-up after the project completion, Aaron Maytum was in constant communication with us. We were very impressed with his knowledge of what needed to be done and why, then bringing the project to life. The final product was beautiful and amazing, better than we ever imagined! A million thanks to Aaron and the staff at Roof Guard for a job very well done. We couldn't be happier!
