

## CUSTOMER FEEDBACK REPORT *for* CDP Environmental Construction

### REVIEW

Ryan R.  
Lantana, TX  
May 30, 2017

Go with CDP! We had a large covered patio added to our house and could not be more please with the end result. Clear expectations were set up front, and deliver on. Daina was fantastic at providing daily updates, managing the many different crews, and always very quick to respond. This level of service was the best I've received since moving to TX 5 years ago! We had a large existing patio and were concerned on how everything would flow together. The end result exceeded expectations and it looks like the new patio was built with the house. We truly live in our new area and I would highly recommend CDP to any friend or neighbor!

CDP built an outdoor living structure for us with a lot of stone. The building is well built and will endure the Texas weather. I have confidence in the kind of work CDP does. Additionally, Chris's 'word' -- you can take to the bank. Integrity and honesty are so often gone after some money changes hands. Not so with Chris/CDP. He says what he means and means what he says. His team walks the same path. I will definitely call him for a future project.

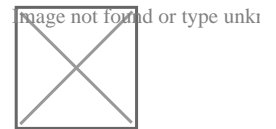

### REVIEW

Amazing project management. Everything was on schedule. 5 mins after a phase of construction was completed, there was someone to clean up each time. Project started as planned and finished early, could not be more happy with the CDP team.

Haslet, TX  
Mar 30, 2017

They weren't exactly timely on a few things, but they were professional. The supervisors came out and Curtis was a good guy. I enjoyed working with him.

### REVIEW

Craig H.  
Southlake, TX  
Mar 29, 2017

Very satisfied with CDP Construction and they provided high quality work. As in most projects there were items that weren't satisfactory the first time, but the sign of a good construction company is how they respond when those items are pointed out and the willingness to resolve. They resolved every item on the punch list and without pushback or requesting additional funding. I've recommended CDP numerous times and will continue.
