The owner was actually the estimator and was on-site working. He was very professional and gave me peace of mind going into the job that I had hired the right person. They were knowledgeable and professional. In the industry to change a work order at the last minute and to get it accepted without sacrificing quality, while still completing in a timely manner is hard to come by. However, they knocked it out, which I was very impressed by. I will hire them again in the future!
