They were just very good. The guys that came out here were wonderful, explained everything to me, and cleaned up after they finished. I was very satisfied.

We had a huge tree fall through our roof causing extensive damage. Georgia Water and Fire were there to advise us of what needed to be done. They were professional, fair, compassionate and thorough. We are very pleased with the outcome. I would highly recommend them to anyone!

I thought they did a professional job and all of the workers seem to know what they are doing. They got the job done and did so in the rotation that it needed to be. Everything was just fine.

The contractors that were used were not respectful of our property and they caused damage to our property that Georgia Water and Fire were not willing to take responsibility for. It caused us additional damage and work that had to be done that they refused to complete

REVIEW

All workers sent to my home were non-english speaking so communication difficult. Must always be aware of what materials are being used to avoid substandard quality of replacement materials. Some agreed upon things were not honored by contractor even with a second reminder. Once job was completed I have not had any response to 2 requests (for the same thing) to the contractor.

I was very happy with the quality of the work done and my interactions with Steve, our project manager Cody and all of the contractors. They went out of their way to work with me to get the damage from my 2nd story hot water heater break and damage repaired. Have already shared with others that they are the company to call!!
