I was extremely satisfied with Level 1 Roofing. They were very informative on the product they used. They finished the job a couple of days before the contracted time line. Their employees are very professional and helpful. I have since used them on a couple of jobs

The guy who did the actual roof work-(Jason?)-was the key to my confidence in this company. He came the day the old roof was torn off to talk with me personally in order to find out exactly what I expected with the work to be done. From what I could tell about his personal and professional integrity, honesty and open attitude to answer questions throughout the process made me feel confident that I had made a good decision on choosing Level 1 roofing. The job was done in a timely manner at the cost expected.
