Awesome team from watwr damage mitigation to restoration. Very responsive, communicated well, and started ASAP even late at night when we had flooding! Space looks even better before the damage! I would absolutely use again.

This process has just begone and I don't have an opinion yet about referring them to anyone. We have had several people come out since the week of April 4th, and we have yet to get this started. Patrick came on board, Tuesday April 28th and he has been very helpful. Once this process is completed, send me another survey to get my honest opinion.

Paul Davis Restoration did a phenomenal job of repairing the damage we had to our home due to flooding. We were notified of our schedule during the restoration process, and all of the contractors did a great job. Starting with the carpenter who repaired the cabinet damage in our kitchen, then followed by the Stone contractors who removed our Quartz counter tops and reinstalled the countertop after the carpenter re-installed our cabinets. Then the plumber who came and re-installed our kitchen sink faucet. Then the flooring people who finished removing the flooring and re-installing all of our LVP flooring. On to the painters who replaced all of the quarter round molding, and then painted everything that needed to be painted. And last but not least, the cleaning crew who came in to finish the overall process. Also, another shout out to Service Master and James Strack who started this whole process, and who uses Paul Davis Restoration as the General Contractor for the overall process.

They provided very good quality, they cleaned up their messes. I did appreciate that with having dogs, they didn't leave any messes. When they did my roof, it was very nice. They hauled away all the old stuff. So, I really appreciated their efficiency and your cleanliness.
