Jun 12, 2019

Jimmy with Premier Pools & Spas of Gulfport is one of the only people I would ever let build a pool. I knew when Jimmy was going to build my pool that it would be a great pool! I'm very happy with the job that they did.

Consummate professionals. Period. Of course we shopped price. And yes, we did find companies that claimed they could complete the project at lower costs. But following interaction with these other companies, there was a lack of overall confidence in them (considering the scope of the project and money involved) Budget was extremely important to us. That said, trust in the company became the primary factor. Jimmy Holston and Ricky Hasty were exceptional from the first phone call/ meeting through the completion of the project. And this was a big project. Every detail and cost were explained, timelines were met, and extra services were performed above and beyond what was contracted or discussed. Following my experience with Premier, I can absolutely assure you, there is no savings going with a another company. I stated above that they are 'consummate professionals'. Nothing could be more true. They are also honest to fault and simply great people.
