Overall, the quality and craftsmanship at the end was great. The salesman was great. The office was subpar. Do research before committing.

We were very happy with Premier Pools and Spas from our initial visit with our Salesperson Sal to the final School Pool class. Every detail was discussed and our questions were always answered in a timely manner. Sal always kept his word and made sure everything was completed per our wishes. Thank you Premier Pools. We have been enjoying our pool most everyday during this hot Vegas summer!

If you do not like communication with a big investment then this company is for you. The work was finished in a timely manner but many complications came after the pool was complete. The people at this company are hard to get in touch with if a problem occurs with the equipment.

Ron Bennett and his team were very professional and easy to work with. The pool looks spectacular and I feel their pricing was very reasonable with the quality and workmanship.

We dealt with Sal and he was absolutely wonderful. The entire process of building the pool was great. The problems came after when small things came up that I had questions about, and couldn't get anybody from the office to return my calls until I called over 3 times. They are very nice and polite, you just need to be on them to get your questions answered.
