Pre work and planning were great. Once digging started, overall communication decreased. Our back yard was left a mess (pieces of concrete, debris, cigarette butts and 2 wires not buried). Even after reaching out numerous times, issues were not resolved.

Mike H., Mike M., & the entire team at PP&S in Souderton, PA were a dream to work-with. I'm a detail-oriented person who maintains very high expectations & I can say that all of them were met (&/or exceeded). From the sales & design process, all the way through construction to project completion, the Premier team was knowledgeable, responsive, communicated well, & performed all work on schedule and to very high standards.

We are very happy, this is the second pool they have built for us! We will recommend them and always use them in the future.

They were great with everything. They started exactly when said. They said to call if I had any questions. When I called, I got a person and not something animated. That is rare. They were phenomenal.
