They did a wonderful job, and they were very professional. They did a great job on the cleanup once the job was completed.

Quality of work wasn't bad and very positive experiences with Mike and Tuan. That's the only positive things I can think of. Working with SRT has been an agonizing exercise in frustration with terrible communication all along the way. Over a year after my house flooded...and the project still isn't complete.

The paint crew worked till midnight once, Towards the end the paint crew brought along a 5 or 6 year old child. I finished up the touch-up myself. My door blind was trashed by the paint crew and never replaced. There were weeks no crew showed up.

I couldn't have been more pleased with the service from Specialty Restoration. Mark Michoski was very thorough with the plan of action for my project and worked hard to get it complete in spite of COVID and SNOW!!!

Everyone was great and the work done is perfect. It took longer than expected as there were delays, but I am pleased with the results.

Jose was very professional and explained the steps necessary that would help restore the quality of our home from water damage. There were delays during the process, where some might even be expected, but in the end, the quality and professionalism pulled it all together. Well Done!

Specialty Restoration of Texas responded to our flood in our house quickly even though it was 8:30 pm. They were able to vacuum out most of the water and worked late into the evening. They were very courteous and explained the process of all the fans they brought in to help dry out the carpet. I would recommend them to help you with your issues in regard to flooding in your home.

The cleanup process, assessment of damages, and quote process were flawless. If you want to actually rebuild the home, I would hire a different company. There was not a lot of communication between the company and I. The building team also fell short of my expectations.

Specialty Restoration of Texas took too long, over four months to complete work that should have taken only a month. They made extra work and expense for themselves when their sub broke a granite counter top, when they miss-positioned a bathroom vanity, broke a floor tile, broke a backsplash tile, repeatedly failed to make accurate miter joint cuts on baseboards, left unacceptable gaps in baseboard and cabinet molding joints, scratched the stainless steel oven door and installed the oven in a non-level position and failed to check and ensure it was level. The owner had to repeatedly point out flaws in workmanship and insist on it being done right. Project manager failed to keep the owner informed on scheduling and changes in the schedule.

The team was friendly and generally pretty responsive. My only knock on them is issues with communication at times where there were misunderstandings about when they were showing up. That said generally they sorted it out quickly and were pretty flexible with me.
