We are very happy with our project, plus it looks great from a cosmetic standpoint. We have a lot of people stop by to look at the project and ask us questions about it.

Cary was great. Also, and one of the owners, the one who came out for the final inspection, was very personable, but I don't know his name. He made me feel very comfortable and I was glad that he was here. I wasn't sure if someone was coming out for the inspection, but it was nice to have him here and it made me feel more comfortable. He spent a good 3 or 4 hours with me, it was fantastic.

The installation crew and Cary, were all great. Cary was the go-to person. He was very organized and just had all the answers, especially for my husband who is a more technical person. Cary was able to answer all of his questions. However, we were not happy with the electrician.

I would recognize Peter, he was good and did a lot of follow up. Also the installation crew who installed the racking and the solar panel.

I was satisfied with the workmanship, the way the final product looks, and that is it running fine.
