We were very pleased with Triple E during the initial visit to the last installation of windows and doors. The crew were excellent, careful to remove window trim so it could be put back around the new windows, worked well as a team doing the window replacement and stucco work that needed to be redone around the windows and door areas. They came early every day, long travel from Prescott to Sedona. Once they started the job, they were here daily until it was finished. We would not hesitate to hire them again.

Comment from Triple E Construction

It was a pleasure working with you both! We appreciate you feeling comfortable and allowing us to complete the work even when you were not home. If there are any projects in the future you need taken care of please don't hesitate to give us a call, we would love to help! Thank you for your business and for your feedback!

When the salesman came to give us an estimate he was knowledgeable about the product and we received the estimate in a timely manner. The installation crew were on time, personable and efficient. They repaired hidden problems that had been ignored/caused by a former contractor and did not raise the price of installation due to the repairs. Office staff communication was excellent, we were even contacted after the job was complete to see if we were satisfied. Very professional and ethical company!

Overall, great company to work with and we are very happy with our home.

Comment from Triple E Construction

We enjoyed working with Mr. & Mrs Green. Grateful for their patience and understanding during the process. We look forward to helping them with future projects!

Everyone at Triple E was courteous and helpful handling a project that included a house full of new windows and doors along with the construction work inside and out that was required.

Everyone with Triple E Construction was great to work with. They made themselves available throughout the whole remodel process and most of all everyone was hard working, respectful and trustworthy. I never had an issue as everyone in the company communicated and made it a great experience.

My 9 yr. old Energy Star rated home allowed my drapes to move on windy days in Northern Arizona. My years owning properties in Wisconsin, I replaced many windows and found the most satisfying to Pella and I found the local Pella Dealer/Installer on-line. Triple E inspected my home, we discussed options, requirements and placements and ordered the windows. I received phone calls of the scheduled install date, a week out and a follow-up the day before work began. The original windows and the Hardy-Board lap siding made the install more customized, the necessary extra trim and time was spent to complete a excellent install. Now I find zero leakage and above all sound reduction from road noise and barking dogs. No negatives, just what I paid for.

They are a professional group that is easy to work with. The products are the best. They worked very well as a team. It felt choreographed because they were so in sync with each other. It was raining and there were minor glitches, but they made the effort and it was very nice. They were very good about showing us how the windows worked and made sure we understood everything before they left.

Our requirements for replacing our nearly 30 year old sliding doors were knowledgeable about their product, good pricing and professional installation. The company was excellent as a whole from the initial viewing of the doors with Jeff and his measuring to the scheduling and billing with Lars to the installation team headed by Dave who handled a few issues that were unexpected finishing on time and doing a marvelous job.

We wanted a walk-in shower that was more than ordinary, yet functional for our needs. We got everything we wished to have, thanks to Jeff Ross and his fantastic crew. Their work was exceptional, and they made the process smooth. We are now enjoying the finished project, and eagerly praise Triple E Construction for making it happen as planned. Customer service and customer satisfaction are their top priorities.

Triple E has excellent workmanship. They could use a little more coordination between the workers and bosses though. It wasn't bad, but it was confusing at time. The quality of the workmanship was worth every penny, and the product was worth the investment.

Triple E Construction met and exceeded all expectations I had concerning the contracted work. The expertise of the work crew, their professionalism, and their attention to detail were greatly appreciated. They were respectful of my home, the animals living in it that they had to work around, and discussed issues and/or concerns they discovered in the structure so I was aware of what needed to be done. I would highly recommend Triple E Construction.
