Lowest cost. Hard working crew with quality materials that worked incredibly quickly, but messy. Shingles & nails, no problem at all - but empty cans, drink bottles & Cheetos wrappers blowing around my yard & shingle bags blowing into my neighbor's yard (that were missed in the clean up because they were allowed to blow so far away) was a bit too unprofessional, even for an install on a breezy day. OK nail clean up at the very end - found only 10-20 nails they missed, that was great - but after the first good rain, there were 50+ more nails at the base of each downspout, meaning their clean up didn't include the gutters, & left me to do it before I mowed

Brandon was great to work with. He was available to answer all our queries and the crew did a nice job on the roof. They replaced the roof, fascia and gutters for my home after the hail storm that hit our area pretty badly last year. Though sales was done by a different guy, Brandon was in-charge of the work when it started and he did a great job of making sure everything was done right. I also had the fascia come apart during heavy winds after the new roof installation and upon calling Brandon, crew was immediately dispatched to take care of fixing the same. It made me happy that Brookens owned their work and were willing to fix issues during warranty timeline ASAP.

Brookens Construction was all that they promised. From the bidding process to the installation, every aspect of my interaction with them was professional and timely. Their crew arrived on time, went to work immediately, they were friendly and informative with my job site questions. When the job was finished, the site was very clean, as if they had never been there. Thank you!
