The project was completed as outlined. Communication with the home-owner is a strong-suit for CORE. We slowed them down on the time-line more than they did to us. Adrian and his team are top-notch, trustworthy and committed to satisfaction for the client.

A neighbor recommended CORE after being happy with their bathroom remodel. We found CORE to be extremely professional -- from the initial meeting, to gathering requirements, to outlining the project (schedule and costs), execution, employees, subcontractors, etc. We were impressed with their ability to understand our design and layout requirements. We have a more modern bathroom than average, and they were expert at atypical aspects like tiling entire walls with large tiles and custom items, like floating cabinets. They are very organized and we appreciated the online project management interface they use --we always knew all the details we needed to know and it was consistently updated. We felt like the people in our house cared about their work and could be trusted. There are so many stories about botched remodel jobs, jobs that took way longer or cost way more than anticipated -- working with CORE was a very positive experience and our new bathroom was exactly what we had envisioned. We are very pleased and would recommend them!

We did a major kitchen remodel and have nothing but praise for our experience with Adrian and his team. The biggest compliment that we have heard several times is that the kitchen looks like it was built with the house. Major walls were taken down, the garage was expanded yet it looks seamless. Core Remodeling paid attention to even the smallest details. He planned for any unknowns in his original quote and spent a tremendous amount of time with us before we even said yes. We have referred him several times and would use Core again if the need arises. Response time was always great and we felt in very good hands throughout the whole process. The Draper's

Our major renovation included a kitchen and 2 baths as well as new paint, refinished flooring, new carpet & lots of structural details. Adrian was most helpful with all the planning and selections. His crew and subs did a marvelous job! We love our "new" old home!

Working with Core Remodeling was a very positive experience. Their contacts for materials were very professional and easy to work with (the young lady who helped me with my tile selections even helped me with paint color!). Their work crews were courteous and considerate. During our initial meeting I felt that sufficient time was spent in defining our wants and needs for the project. Any questions or concerns that I had received a prompt and courteous response.

CORE Remodeling was professional, timely, sensitive to the house during all phases of construction, kept us informed through a detailed punch list and timeline, answered any and all questions/concerns, and made this remodeling project as easy as possible during the work phase. I recommend them with my highest endorsement.
