Gary and his team at Cornerstone were excellent to work with. Straightforward process with clear deliverables throughout the building process. For all intents and purposes, our new house has been trouble free for almost a year now.

Cornerstone delivered a high quality product at an affordable price. They were right on schedule, right on budget, and followed through on their end of the deal exactly as discussed. They explained the process in detail so there were no surprises. They communicated with us through the whole process and always gave us options. Their crew was extremely professional, outside of the finished product, you would have not been able to tell they were there! I would recommend them to anyone without hesitation and was extremely impressed.

Gary and his team are not only very professional, but they understand what it takes to make a house energy efficient. They go above and beyond what I would consider industry standard in regards to insulation, weather proofing, sealing, vapor barriers, etc. The house is extremely tight and well built.

This was by far one of the best built homes I have seen!

Comment from Cornerstone Specialties

Thank you so much.
