We've used Cosmos twice- both for multi-room projects and they have done a great job both times. We would certainly use them again

This was our second time using them. They had painted our entire house at least ten years ago and the painting they did initially stood up to the point that they only needed to repaint two sides of the house.

Cosmo Ptg. has always done an outstanding job for us over the years . Having a house on the water presents some issues in paint durability and John has always succeeded in improving the longevity and appearance of our home with the latest in material and application technology .
