It snowed the day my windows were suppose to be installed and they still got everything done. They done all the prep work in the warehouse and when they came in they got the work done in one afternoon.

As a single gal 1st time home-buyer, I was apprehensive about tackling home improvements...especially on such a large financial scale as siding!! I was recommended Haggerty by a coworker who has used their company for windows for years. She knew the Haggerty's by name, knew their family stories, etc. From day one, I had a fantastic experience and results. I met Ryan on the first day and with his knowledge and professionalism, I felt I would have a company for life. Things haven't changed after the completion of my second project with Haggerty of insulation installation after a MidAmerican Energy audit! Ryan Haggerty actually recommended the audit for my home at the time of siding completion, gave me the phone number to call, and helped me through the process! Their company recommends great products (not the cheapest estimate I received but worth every penny), and pushes for minimization and NOT overcharging for unneeded work. I appreciate that aspect very much about this family company. They want the work done correctly, fairly, smartly, and to be a show-stopper on my beautiful street of Beaverdale bricks!! I have already recommended the company to multiple co-workers/neighbors and would stand behind them 100% ~ I also recommended surprising the workers with Dunkin Donuts or Jimmy John's subs because they deserved it:) I cannot wait for the NEXT issue I have with my 1925 built home just to call for their help & expertise!!

The quality of the work was amazing. Those who work for Haggerty take pride in their work and make sure it is done the right way the first time.

We went with Haggerty Construction, because we could get all the things we needed done with only having to deal with one contractor. They were very competitive and worked with us on special items and specific ways we wanted things done. The work was very professionally done and prices were very competitive. They gave us options and let us decide which ones to take. They also worked within our budget ,even when there were problem areas that came up. We would recommend them and are going to use them for interior remodeling on our home.

I strongly recommend Haggerty Windows & Siding. All work was completed in a timely manner & according to the contract. When the windows were installed, I couldn't tell they had even been in my house that day. I had no clean-up inside or out to do once the job was finished. Everyone I dealt with during the job was professional & cared about the job they were doing.
