I have an uncompleted project with Pro Skill which was estimated to take only 6 months but has dragged on for 2+ years. We have not had a contractor working in our house since July despite being PAID IN FULL!! It's obvious at this point that they have no intention of completing work. We have been threatened with a lien on our home by a subcontractor who they owe monies to. Pro Skill has sent the subcontractor several checks which have bounced. They are very unresponsive to communication attempts which have further stagnated efforts to resolve our situation. I would NOT recommend them to anyone for any sized job.

We are so thrilled with our kitchen and bathroom remodel from Pro Skill Construction. Avi, Ajay and Adam are the best. They are all truly wonderful human beings who also happen to make a great team. We had basically given up on finding anyone competent to help us with our potential remodel. But these guys took the anxiety away and made the process as painless as possible. They are incredibly responsive, caring and concerned about the project, but best of all, they are really really good at what they do. They have a ton of experience in the industry to draw from and that's what makes you feel like you are in great hands, from the very first meeting. They just know exactly what they are doing and the workmanship clearly shows through. Of course some things came up along the way, but they helped us through it all and made some beautiful modifications. We could not be happier nor could we recommend them any more highly.

ProSkill came highly recommended by one of their former clients, and we are appreciative to have had a similarly gratifying experience. They installed a 20' x 30' addition to our ranch home, reconfigured the layout of the entire floor, including the kitchen, bathrooms, and bedrooms, and vaulted the ceilings. The finished product is nothing short of excellent! We wholeheartedly recommend their services.

The workers are so professional and creative. They take care of the situation and build something from scratch and make it something beautiful. I will highly recommend them. They're honest, come on time, and clean up. My house was spotless when they left. The staff is high quality and courteous.

I hired ProSkill because of an incompetent contractor I had hired previously. They became my knights in shining armor. Avi and Adam drew up a plan, which was beautiful and executed with great expertise.

They didn't cut corners or fall sort with their workmanship. They were prompt and used their best workers and materials. My neighbor, a contractor himself, looked at the job and he said they were really amazing. Even as one of their competitors he said that if you go and try to find workers like that, you can't find them anymore. I was very impressed.
