STL Design & Build did a great job on our kitchen/main floor project. They were very helpful in design throughout the entire project - not just in the beginning. Everyone was very professional.

We appreciated how they did their work. They were timely, friendly, courteous, and they let us know what was going on at all times. Our bathroom is beautiful and we are thrilled!

We had an extremely positive experience with STL Design and Build every step of the way. Tom and Mark, who met with us at the beginning, helped us visualize a variety of possibilities within our budget. They had great senses of humor and were not at all pushy. They had their own ideas, but really listened to our ideas as well. The project manager Dion coordinated with us effectively and responded to questions quickly and courteously. Scott and Kenny, the two workers who did the majority of the work, were very personable and did high quality work. They were very sweet with our two little boys as well. We love our kitchen and would recommend STL Design and Build to anyone!

We had one issue regarding clean up of the yard when the old roof was removed, but one call to Cheryl Dennison and the crew supervisor arrived on scene and the proper clean commenced immediately! No more problems.

I would highly encourage anyone to use the services of STL. Things don't always go perfect but they will do whatever it takes to make it perfect. There is no question that customer satisfaction is their number one priority. They are definitely my go to home improvement company.
