Smart Home Innovations was very good to work with. Answered all questions in a timely manner and made sure I understood the answers. Andy instructed me on how to turn the system on once the utility company changed the electric meter. One concern would be to notify owner if the work was starting earlier than tentative date, so owner could have site unlocked and be on site to identify locations of systems not covered by utility locating services. System is operating as designed, very happy with all the staff we worked with.

It would be nice to have a representative come back out to our home to go over the program to show us the guidelines of the operation and how it works.

The only question I had was we haven't found out when we will be starting to take our payments out because we want to correlate that with our mortgage insurance and our car payment. Hopefully, I've got three sales made already.

It hasn't been used for more than a week. I can't rate the product at this time. The rating is based mostly upon the customer service and interacting with the company.

I always research before I make a large Investment and this is where my money landed. I am very happy with my investment, and the company. I had a lot of questions as anyone should and they were all answered swiftly and in full. The installers were fantastic and took special care in each step of the installation process. You can not go wrong with this company.

Dec 05, 2018

Smart home innovations was very professional and knowledgeable about their products and installation. Brianna who was my project manager was extremely helpful and went out of her way to answer any and all of my questions and worked hard with my hoa to get us approved. Our hoa has never approved solar panels in the past and initially denied us and Brianna did what she needed by gathering any information they needed and got it approved through them!!

Mother nature has some reasoning behind my low scores, but I am still not happy with the ruts in my yard, the time it took to install the system, and time it took to repair my yard from the truck getting stuck and the tow truck pulling it out.

Smart Home Innovations ha been great to us. They have supplied education as well as great workmanship, I look forward to continue to work with them. I do recommend asking or making sure a consumption meter is part of the equipment being installed it makes a world of a difference.

Aug 09, 2018

Adam was very knowledgeable and helpful with the information he presented, which is why I chose Smart Home over a company with more years of experience. The Smart Home Team was all very polite and patient whenever I had a question or issue of concern. They installed my solar system in record time & I was greatly excited. It feels good knowing that I'm using renewable energy, saving money and helping the environment all at the same time! ?
