Bristol Pacific exceeded all expectations! The quality of the home they build is second to none. The sub contractors used on my home did an excellent job. Sandy and Gary were a pleasure to work with throughout the entire process and were always there to address my questions and requests. They even went the extra mile to ensure we closed on time. I would highly recommend Bristol Pacific to all looking to build their dream home!

My wife is handicapped and the workers of Bristol Pacific Homes modified the house by putting a ramp in the garage, so that she could get in and out of the house. They also did a lot of modifications inside of the house, which we really appreciated.

In our opinion and experience, we found that Bristol Pacific Homes of Fall River would rank highest in our area for quality in home design, construction and workmanship. No builder is perfect, but, Bristol Pacific cheerfully builds homes with experience with pride and it shows. Bruce & Diane Wingate

As an engineering manager who has built several homes prior to my Bristol Pacific home, I can say that I would have them build my next house.

Living in Westport most of our life, we were always impressed with the various developments Bristol Pacific built. We consider them to be the premier home builders in the area. From the time we started planning with their architect to the day we moved in, everyone we dealt with, including their subcontractors, were professional and knowledgeable and bent over backwards to please us. I would not hesitate to highly recommend them to family and friends to build their homes.
