I bought a condo in RVA and had it gutted. I had a vision of urban industrial loft chic and CCI helped me reach my goal. I am absolutely thrilled. I had definite desires to incorporate ideas (some very unique) regarding the loft style feel, high gloss touch cabinets, unique lighted counters, walls with pocket doors & sliding doors without the barnyard door feel, ceiling soffit design touchesto name a few. Rob helped me flush/figure out design ideas, then implemented each one with smashing success. I am thrilled CCI was able to take me on as a client for the 4+ month project. I feel totally modernized here with amazing natural light throughout the condo.

It was good when the cabinets arrived and were installed - but we were told 6 weeks and because of staff problems there the cabinets didn't arrive for 10 weeks. It put everything else on hold.

Cabinetry & Construction performed a wonderful remodeling project for our 110 year old Fan house. They did a complete remodel of our kitchen and two bathrooms. From demolition to the final coat of paint, Rob and his crew put quality into everything they did. They are all very nice to work with. Rob gives excellent design advice and helped us work through all the challenges that we faced. His many years of remodeling old houses is invaluable and he made suggestions for improvements that we had not even thought of, adding some very nice features which we now enjoy daily. I highly recommend CCI.

Rob and his crew at Cabinetry and Construction are top-notch! I couldn't have found a more knowledgeable contractor to work on my home. The remodeling process went as well as could be expected, and I am so pleased with the results! Rob is a good listener and comes up with creative and innovative solutions. He took my wish list and worked with me and my budget to get it all done.

Cabinetry and Construction renovated and expanded 3 bathrooms in our 110-year-old home. Rob is creative and ingenious; nothing in an old house stumps him, and he has a wonderful aesthetic eye. His employees are unfailingly polite, personable, and conscientious. He employs the most skilled subcontractors imaginable. We've worked with others, and I can confidently say that I doubt there is a better in the city than Rob and his crew.

C&C has done several renovation projects for us. They are professional, extremely capable and very easy to work with. The workers are intelligent and well- educated. All problems that crop up are dealt with easily, without hassle, and the work is usually finished within the time frame estimated. We will keep coming back to them for future projects.

Cabinetry & Construction completed two renovation projects on our Fan home in 2013. First, we added a front porch that perfectly matches the period of the house. So many Fan walkers stop and compliment us on how beautiful it looks. We were so pleased with the results that worked with C&C again for a complete kitchen renovation. Rob had excellent suggestions and has extensive knowledge of Fan houses. We would highly recommend the company to anyone.

Rob Wright and his crew have provided us with first-rate renovations for a quarter of a century. They have consistently been thoughtful, courteous, and professional in their dealings with us. They are a trustworthy company. Their floor-to-ceiling bookcase is the pride of my home office and our renovated kitchen is a joy to work in. We have and will continue to recommend them to our friends and neighbors. They are a pleasure to talk to and to have around the house.

Our experiences with Rob and his team exceeded all expectations. Rob has wonderful ideas and is able, through his talents as well as those of his crew, to make those ideas a reality. He is very personable, responsive and a pleasure to work with. After we had him do a major construction/renovation to our home, we were so pleased that we had him come back and renovate two bathrooms. The quality of the finished projects is beyond compare.

We highly recommend Rob Wright and the team at Cabinetry & Construction. We have had them do 2 major renovation projects within the last 3 years and could not be more satisfied. From start to finish, the jobs were executed extremely well and seamlessly and Rob and his team are true professionals and a pleasure to have had in our house for extended periods of time. The end results are gorgeous and we couldn't be happier.

We couldn't be happier with our project. Rob, Connie, Andrew, Dennis, Chris and the others who worked on our renovation/addition were outstanding. They were all easy to get along with and addressed any issue, small or large, quickly and with a level of expertise that we weren't sure existed any more. On the day when the work was completed, Rob pulled up the heavy paper that had been covering and protecting our new floors and counter tops, and I couldn't believe what I was seeing. It was 100% what I had hoped for and could only have imagined. The level of fine craftsmanship is beyond any that we have seen locally. We can't recommend Cabinetry & Construction highly enough.

While working on any old house, there are always hidden challenges. I am a detail oriented person and it is the small things that make a design project successful. There were specific goals I had, I was able to express my ideas, Cabinetry & Construction was able to translate my design ideas into reality. My kitchen is EXACTLY what I wanted and just as important, delivered on time.
