All work quoted was not completed because Capital could not locate appropriate replacement shingles. We repeatedly asked for shingle model/type so we could attempt to locate the shingles on our own, but Capitol did not respond to our requests. So in the end we must find another contractor to complete the work. After the installation we found a shattered a PVC water line where the crew had been working and nothing was said about the damage; subsequent repairs were needed to the water line. There were numerous old screws left laying about the house that had to be cleaned up after installation.

Chris Dixon and his crew were outstanding and very professional in performing my home's power wash and deck staining project. They are perfectionists and VERY personable. They've raised the bar so high, that I now consider them the Gold Standard in contractors. I have no need to hire anyone else since, thankfully, they do it all!

Chris and his crew did what they said they were going to do, at a good price and on schedule. Can not be more satisfied with his work and commitment to quality.

This company is the only one I would recommend to people.. Chris and his crew are more professional than any contractors my husband or I have ever used. Their prices can not be beat and the quality is even better. We love this company!
