Mark was great. He answered all of my questions in detail and was easy to talk with. He was always available when a question came up, both during the build and long after the pool was finished. He spent an entire Sunday troubleshooting an electrical issue which was eventually solved. I have nothing but good things to say about Mark and Premier Pools. Start to finish, the whole experience could not have been better and I did not have to worry about anything. Thank you.

My spa was supposed to be raised. Eventually they did do it, but they had to make changes.

We built a pool when we lived in Arizona and the difference between the people and the process here in Fresno is remarkable. We are so happy with Steve and the product.
