Dureiko Construction provided us with a seamless, problem-free experience. I was concerned, because this was a kitchen renovation, about the disruption in our lives. They created a very comfortable alternative during the construction. We are so happy with our new kitchen and would recommend Dureiko Construction employees and subcontractors highly.

Dan and his crew have been professional, courteous and accommodating every step of the way. From drawings to demolition to build, the work has been on time, in line with our conversations and hopes for the space, and without drama. A great first experience with builders who know what they're doing.

I would recommend him to anyone in a heart beat. I have invited a realtor friend to see the finished product so she can see who is out there for renovations and remodeling.

This is the second big remodeling job Dureiko Construction has done for us. The first was our kitchen, this a master suite and second bathroom. Dan is extremely professional, capable, experienced and organized. The process went smoothly, no major surprises. The subcontractors working for Dureiko Const. were also good. Most of all, we love the results!
