WARNING: this company does not work in good faith. I had posted on google reviews my issues with this company and on 6/22/2022, a women who works for them showed up at my home and threatened me to take down my review or they would sue me. Which is ironic, because we had to start the process of suing them in order to get them to either do our job, or return our deposit. Overview: they were contracted in January 2021 to refurbish a deck and put in a new patio. They completed the job in April 2022. After well over a year of not showing up (which includes leaving our deck stripped of flooring and unusable for several months) and either lying or ghosting us (not returning our phone calls, texts, or emails,) they finally sent in crews to finish our deck and start our patio. The crew that did our patio did a very good job. Unfortunately, this was a hired crew, the forman was actually a former employee of AE, he quit because he was not getting paid. He told me our job (patio portion) was the last job they would contract to do for AE because it took them way too long to get paid. This was such a stressful ordeal. And now because I am warning others, they are threatening me. Unreal. I wonder if they are threatening all the people who gave them bad reviews. They did this to many people, we were not the only ones. Lie. Ignore. And now bully. Stay clear if this is not how you want to be treated.

Carmen, Daniel and his crew showed up right on time and quickly completed the demo and finished the paver portion of our Patio with Fireplace project the first day. They far exceeded their timeline, even with a few days of inclement weather. They kept me informed of the progress and the finished product is superb. I highly recommend these guys if you are looking to get a top-notch patio and fireplace.

I am so glad I went with American Exteriors and Masonry to install a walkway and construct a new deck. The final results are amazing and have had so many compliments on both parts. Dan, our salesman, originally came to our home and worked within our price and guidelines. He was very responsive and professional in the sales presentation, the follow up, and the whole process. When there were some issues that arose, Carmen (the owner) promptly responded to the concerns and let me know what was happening and how to work with me. He showed up on the day of each installation to ensure the crew knew the specifics, and put my wife and me at ease. The end product is incredible! The workmanship and the quality is top notch. We have had so many compliments on the deck and walkway, and truly has made a difference in our house. I will only turn to American Exteriors and Masonry for my outdoor construction and look forward to working with them again!

Outstanding Company. I am not one to say that lightly. The crew was courteous, professional and did an outstanding job! The customer service from estimate to after completion has been responsive, flexible, professional and very timely. They arrived on time, worked hard and finished quickly. We would not only recommend them, but we would definitely hire them again.

I chose this company because they seemed the most knowledgeable and well-managed of my options, and it was the best decision I've ever made. Nate was invaluable in helping me design and plan my project. and Daniel and his team laid my pavers in record time, turning out a flawless product. Communication was great throughout, people showed up when I was told they would, and I was pleased that Nate personally oversaw the installation. I can't recommend these guys too highly.

American Exteriors and Masonry built a beautiful walkway for me, and installed the same stone on my interior fireplace; they did a great job, and cleaned up the area very well after installation.

American Exteriors had an unexpected opening in their project schedule and called to ask if we wanted to start right away with ours. We did! We had two sets of 60-year-old, sinking, crumbling, flagstone pathways and steps redone. Ideally, we wanted to be able to reuse the existing flagstone because it added so much character to our home. But, to our chagrin, every other bidder we talked to before contacting American Exteriors wanted to dig up the original flagstone and replace it with pavers or concrete. They seemed reluctant to get into restoring what we already had and more interested in replacing what we had. Nate, our first contact with American Exteriors, was the first person to tell us it would be a shame to replace the flagstone with pavers or concrete because our flagstone was in great shape and of very good quality. That's what we'd been waiting to hear! They started the project on a Monday and were finished by Wednesday. It was obvious the crew was very experienced. They worked together like a well-oiled machine, very professionally, in an efficient and timely manner, and the result is beautiful! We hired the right people for the job!
