Maurice was wonderful and I love working with him. The carpenters on our job were very easy to work with and did things the right way. The subcontractors were relatively good and I am enjoying my finished project.

I would recommend Tony and the whole group at Jarro Building Industries Corp., to anybody. They are amazing people and amazing workers. They are incredibly honest and approachable. They want nothing but to please. They were incredibly patient with me after the storm. They went above and beyond the call of duty for me. I cannot say enough about them. They went far above my expectations.

We talked to several contractors and Jarro actually took the time to understand what we wanted. The other showed up, gave an estimate in the spot, and asked for a check. Jarro came over discussed the project, took measurements and photos, and then met with us several more times before they came up with a plan. Then when we agreed on a price for the work, Jarro set up a payment schedule based on the completion of each item of work, exactly the way payments are supposed to be made for construction work. During the course of the project, they were able to easily deal with changes that we wanted and they were fair with the extras. The best part was about six months after the project was finished a few minor issues came up and Jarro came over without question and corrected them. I will use them again for any new projects.

With a major renovation of a den extension, master bathroom addition, roofing, siding, patio addition etc...meeting Tony made choosing Jarro an easy decision. The staff at Jarro provided the knowledge, professionalism and craftsmanship to turn our renovation ideas into a beautiful reality. It was great working with everyone at Jarro and we thank them not only for their fantastic work but for a stress free project!

Jarro was hired to rebuild my home following Sandy. Prices were reasonable compared to other contractors. From start to finish staff was available to discuss all aspects of the work and options available. materials used were of high quality and work was completed with few flaws which were corrected immediately. However, the homeowner will be expected to provide certain materials involving aesthetics such as tiles, bathroom fixtures and lighting. the advantage to this is getting what you really want, not the contractors choice you have to live with. Overall, totally satisfied.
