We are very happy with the work done by Potter Construction. Our site supervisor Jeff was great to work with. He kept us informed of the schedule of our project. The construction area was organized and as clean as possible. We would definitely consider Potter for me remodel projects in the future.

We were impressed with Potter Construction throughout the build phase of our bathroom remodel. Riley, the Lead Carpenter, was extremely responsible and careful of our home, and he is an excellent listener. He picked up comments during our discussions, as well as observing carefully, and applied what he learned in the details leading to a very satisfyingly result. We were continually impressed with how quickly he works, and how well-scheduled the entire project was, including a variety of "as long as you're here" add-ons around our house. The subcontractors that Potter uses were equally professional, friendly, listened to our comments, and really stuck to the schedule. The weekly progress meetings, including reports of costs versus estimates, were very helpful in giving us confidence that the project would be completed as expected. The planning and design phase was accelerated when an earlier window opened up for our small project. We appreciated the frequent meetings with Matt and the designer, but too much expensive time was spent pursuing options that turned out to be beyond our budget. We've provided feedback to Potter on how that process could be improved with earlier budgetary estimates to avoid expensive but fruitless design efforts.

Great company, good people to work with. They responded to our ideas and Jeff, the lead carpenter, often went above and beyond to make sure the job was completed to the best of his ability.

We recently used Potter Construction for a major home remodel. They were an amazing company to work with. Gary Potter has the talent and ability to hire only the best people from top to bottom. He listened to what we wanted to do and executed everything to the highest standards. He and his people were talented, meticulous, courteous, on-time and on budget. I would highly recommend them.

Potter Construction is very experienced at knowing what should be done and how it should be accomplished. Good at playing "devils advocate", if you want them to, in terms of what actions are best for your situations. After all ..... they are the pros with the experience.

We had 4 windows replaced in a family room, and it was a fantastic experience. They spent a good amount of time measuring and fully examining the existing windows, and it really paid off. There was one day of prep once the replacement windows arrived, and then they did all the windows, including priming the outside trim, in one day. I left in the morning and came home that evening to see the job completely done and cleaned up.

I've hired Potter Construction for a few projects around my house - projects both ultra-large and small - and have been incredibly impressed, every time! The work was supremely well done - better than I expected or paid for. They overbuild, paying minute attention to the details, and the project gets done well and gives me a confidence not usually possible in a building over 100 years old.

I have used Potter Construction since 2006, based on a strong recommendation from my neighbor, who showed me all the beautiful work that was done in his home. I am always pleased with the work and the results. Although I will retire soon, and won't be able to afford any more major projects, I will continue to call Potter for smaller projects, as well as the occasional handyman service. Maxine Z.

While no project is perfect, my wife and I are most pleased at how our bathroom remodel turned out. Potter Construction was patient as we worked through all of the design decisions and assisted with information on materials and possibilities. They explained how and when the work would be done and kept a running calendar to keep us informed of schedule changes. The craftsmanship both inside the walls (plumbing, electrical, etc.) and outside in the finished product are first class.

I have a beautiful kitchen I love. Gary provided ideas while listening to mine. The crew was easy to work with, cheerful and dependable. I was provided with contacts that provided me with choices for my kitchen that were quality companies that delivered a quality product. The electrical sub contractor is one I will call on again. Potter Construction would be a company I would not have a problem recommending to others.

Potter Construction was thorough and professional in their examination of what needed to be done. Once they realized I knew what I was talking about, they listened. That meant a lot. They worked well and in a timely manner, and I'm pleased with all the things they've done. Taking a bath now is like a small religious experience.

When we realized it was time to do repair work on our shower walls, we were intimidated to say the least. We decided, however, that it was a good opportunity to update the whole bathroom and started our search for professional help. After our first meeting with Potter Construction, everything seemed more manageable. We were presented with choices that fit our style and our budget. Communication about payments and work plans was very clear. The employees were all very professional and worked efficiently. They cleaned up at the end of the day and let us know what to expect at each phase. We are very happy with the results--our bathroom has never looked so good.
