If I have any needs in the house I think to call them first. They advertise themselves as home builders but they are also very capable home remodelers and improvers.

From start to finish, they did a professional job. They kept to their budget and did everything on time. Glen Schwall checked up on the installation. The clean up and the follow through was perfect.

We have been working with Schwall Builders for over 10 years. From recently replacing a light fixture to our major home renovation/addition to work in our commercial building. They are highly professional, maintain open lines of communication throughout the job and produce high quality work. We continue to recommend them to our friends and family and would not think of calling anyone else.

Schwall Builders has worked on a wide range projects for us. From window replacement to greenhouse repair to stucco repair to wood trim repair to exterior painting to roof repair & replacement to rerouting the sump pump drainage to design plans for an addition, all work has been done in a high quality and professional manner. All the subcontractors do exceptionally careful work, are great problem-solvers, and follow through on every commitment. Everyone at Schwall Builders is very pleasant to work with and I have come to value and trust their recommendations and careful review of all project details.

Partnering with Schwall Builders on our new kitchen was the key to a great renovation project for us. They offer wonderful guidance and advice throughout the project, their carpenters and contractors are very professional, and they do very high quality work. There's always surprises along the way and Schwall stepped in with solutions while keeping the project on task. Their communication is excellent and I was always aware of what was happening and when. All in all, Schwall Builders is a pleasure to do business with and they deliver high quality results.

I have entrusted Schwall Builders since 1997 to improve my first home, to build my current home in 1999, to renovate my medical practice in 2003 and 2010. I have never had a problem!! On time delivery and no cost overruns. Well worth the few extra dollars.
