I was very happy with the sales process and workmanship of the staff. Though I wish the project manager communicated with me better before the installation.

Assigned team worked hard and efficiently. Project completed within stated time frame. Working materials were picked up and stored each night before team left. Very pleased with outcome & have received several positive comments from nearby neighbors.

Our installer, Norbert, was absolutely outstanding in every way. In addition to being a talented installer, he was personable, prompt, and cared about doing a high quality job and having us satisfied every step of the way. There were some alterations that were made along the way and he was receptive and responsive to the changes that were made. We were kept well informed all through the project by Franz, the project manager. He was very fair and responsive to our concerns. Although there were problems in the production and installation of a large storm window, it was managed as well as it could have been and we were very satisfied with the outcome. We would not have had any other company do this work for us and the final product is outstanding. We have already recommended you to two friends who need siding replacement.

I've used many contractors over the years. Their entire group was extremely helpful, answered all questions thoroughly, before and during construction. The job was done better than I could have hoped for. It really does look like a new home.

★★★★★

I wish I could give 2 different ratings - 1 for the workmanship, professionalism of the installers and overall happiness with the look of our house and another rating for the communication and responsiveness of the office staff. Our house was "completed" in August, yet there is still an outstanding item despite numerous texts, emails and communication initiated by us for when it will be completed. Communication is horrific and sporadic. I truly hope someone will contact us to finish this project as soon as possible.

We began our project with Angelo and he was extremely helpful when it came to describing the materials, providing us with reference addresses to drive by, and building a few renderings of our house so we could get a better visual on what our house would look like in a couple of colors or siding orientations. Once we were agreed on colors, I received a phone call much sooner than expected that they could start the project EARLY! We have a baby on the way and they kept that in mind with our project scheduling which was extremely helpful. The two men on our project were here each day the weather was favorable (even the 95+ degree super humid days and they wouldn't let me bring them anything), they were courteous, they cleaned up the materials each night and organized neatly, and they communicated with us when any issues or unexpected items were encountered. They would also talk with the office who then called us to review anything out of the norm that arose and what the options were to proceed. For the most part, everyone was very responsive and communicative throughout the project. While the estimated install time was 2 weeks and it was completed in 4, knowing that there were some unexpected issues (prior owner installed siding on top of siding so demo time was doubled for example) the house looks amazing and has a whole new look. Very pleased with the end result and the real test will be when the woodpeckers even TRY to come back.

After a lot of research, I chose Siding and Windows Group to update my house with new James Hardie siding, trim, fascia and soffits. Also added a new kitchen window and new gutters. The craftsmanship of the installers was excellent. They solved all issues they encountered with an old house. They were on time every day (even in the cold weather of March-April) and were meticulous in their work. Very high standards. We have received many compliments on our "new" house. I was impressed by that the owner of the company visited at the start and finish of the project. I had highly recommend them if you are considering such a project.

Barrington, IL
Sep 01, 2017

They completed the tear off of all of the old siding and trim plus the installation of hardie board shake and siding on our 1920s Sears craftsman home in June 2017. We had them install roof brackets, replicate the band board and drip cap details original to the home and install new gutters as well. They were on time every day, extremely friendly and courteous and above all well qualified to perform the job.

REVIEW

Melanie K.
Schiller Park, IL
Jul 27, 2017

My family and I are beyond happy with the professionalism, product, and follow up from the staff at Siding & Windows Group. There are no ratings that can demonstrate how happy we are. From the start of our large project, everyone in each of their departments was extremely professional and pleasant. The manner in which the crew performed their job made this project one of the best we ever experienced. They worked, and cleaned, and worked, and cleaned, we almost didn't even know they were here! Everyone we dealt with, from the salesperson, the office staff, the crew, even the owner, was absolutely professional and nice. As we all know, doing big projects like this can make a dent in our pocketbooks, but I have to say, the outcome of the work performed and the high quality of the product makes the financial part well worth it!! We would (and have) one thousand percent recommend not only this product to everyone, but also and mostly to be installed by Siding & Windows Group. This was a flawless experience and one of the most fun we've experienced. We absolutely LOVE how our house looks as well as the functionality of the product and the purpose it serves for our house!! Thank you so much Siding & Windows Group for a job extraordinarily done!!

Jan 15, 2017

Our sales person was wonderful, suggesting options we had not even known were options, pricing our project out with line items so we could easily understand the costs, and helping us generally make good decisions for our budget, home, and timeframe. Our project manager was on top of everything, keeping us well informed and when a miscommunication happened, was extremely professional. We are very pleased with the people who worked on our project, with the work done, and the final look of our home.

Dec 26, 2016

Siding and Windows group did an outstanding job on the siding replacement of our turn of the century Craftsman home. The sales staff was knowledgeable, the crew friendly and professional, and the quality of product and finish was outstanding. The job took longer than expected and we would have appreciated more design tools/guidance at the start but overall we are very happy with the end result. Would recommend.

Nov 23, 2016

We have recently had our windows and siding done with The Siding Group and could not be happier! Greg guided us every step of the way. He helped us choose the right look for our house and pick appropriate products to help us maintain its style. We ended up using Integrity All Ultrex fiberglass windows by Marvin and James Hardie fibercement siding as well as Longboard aluminum siding for the feature walls. These products brought up the contemporary look of our house without overwhelming it. The work done was performed in a professional manner from beginning to the end with extreme attention to detail. Greg and the Siding Group performed beyond our expectations. We would recommend them without hesitation!
